

Code Mates

AI APPLICATIONS & ERP SOLUTIONS

YOUR RELIABLE IT BUSINESS PARTNER

www.codemates.ae

Who is Code Mates

Code Mates is your leading provider of cutting-edge ERP (Enterprise Resource Planning) software solutions. We specialize in delivering comprehensive and innovative ERP software tailored to meet the unique needs of businesses across industries. With our state-of-the-art technology and a team of seasoned experts, we empower organizations to streamline their operations, enhance productivity, and drive sustainable growth.

In today's dynamic and fast-paced business landscape, managing resources, optimizing workflows, and making informed decisions are crucial for success. Our advanced ERP software equips you with the tools and insights needed to achieve operational excellence and stay ahead of the competition. Whether you are a small start-up, a mid-sized enterprise, or a large corporation, we have the perfect solution to unlock your business's full potential.

At Code Mates, we understand that every organization is unique, and therefore, we take a personalized approach to meet your specific requirements. Our team of seasoned professionals works closely with you to understand your business processes, challenges, and goals. Leveraging our deep industry knowledge and technical expertise, we design, implement, and support a customized ERP solution that seamlessly integrates with your existing systems and maximizes your return on investment.

Who is Code Mates

Our ERP software encompasses a comprehensive suite of modules, including finance, human resources, supply chain management, inventory control, customer relationship management, and more. By integrating these critical functions into a unified platform, our software enables real-time data visibility, collaboration, and efficient decision-making. Say goodbye to siloed systems and manual processes, and embrace a centralized, intelligent solution that empowers your entire organization.

With a strong focus on user experience, our ERP software is intuitive, user-friendly, and designed to enhance productivity. We offer comprehensive training and ongoing support to ensure a smooth transition and enable your team to leverage the full potential of our software. Our commitment to excellence extends beyond implementation, as we provide continuous updates, enhancements, and dedicated customer service to keep your business at the forefront of technological advancements.

Who is Code Mates

The team members:

- Techno-functional consultants
- Artificial intelligence and machine learning developers
- Back-end developers
- Front-end developers
- Data scientists
- Mobile application developers
- Technical Support

Our CAFM & ERP Solution

The One Stop Solution

For All Facility Management Companies

Our CAFM & ERP Solution

- A. Technical Related Features
- B. Operation Related Features
- C. Management Related Features
- D. Internet Of Things

- **Separate the application server and the attachments server**

This will enhance the database performance and reduce the loading time.

- **Server Snapshots and auto transfer to other server within 20 Minutes**

This feature will reduce the risk of downtime, the user will be auto redirected to a new server with the last 15 minutes transactions

- **Server monitoring UI**

We can monitor the server performance from the application

- **Versioning Control**

Users can report a bug directly to code mates, suggest a new feature, and we can classify the requests and share the road map, users will also get notified when a new feature / version released, new features/release notes will be introduce to all users upon login.

System Monitor

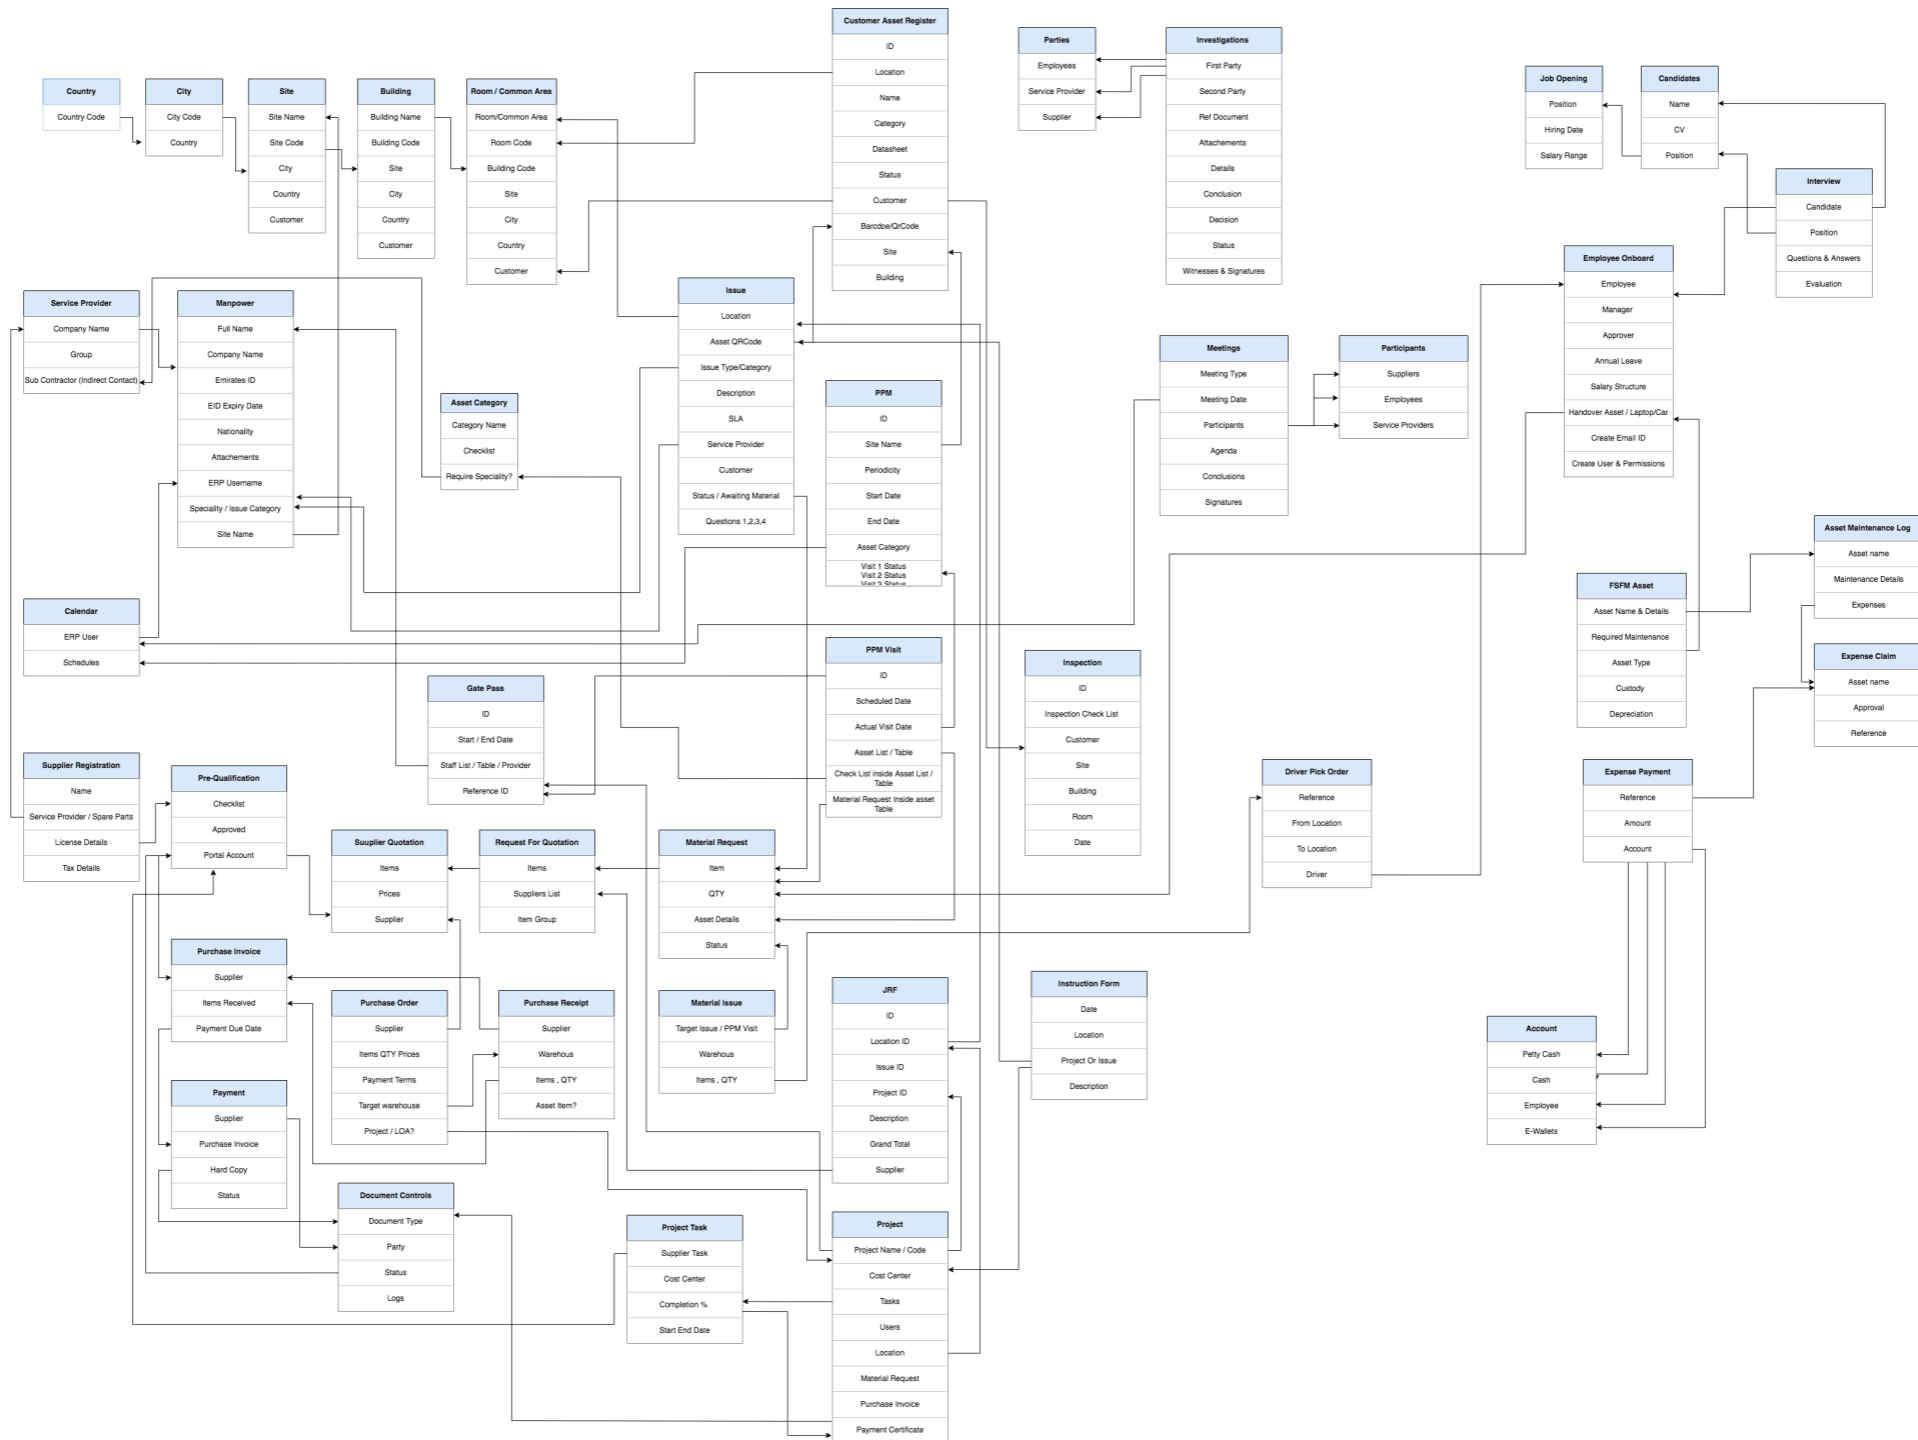

OS	Linux
Release	5.15.0-1013-gcp
Running Since	2022-08-01 07:43:58

CPU Frequency: max(0)

System Structure

- Responsive website compatible with all screens
- Managed from the ERP system
- Receive issue from website
- Post the job opening on the website
- Collect CVs from the website
- Supplier Registration Through website
- The new supplier portal
- Blogs and articles

- The asset module is deprecated
- Separate the modules, City, Site, Building, Floor
- Link the assets with customer module
- Asset Manufacturer
- Manufacturer Website
- Snagging on site/building/floor/room level
- Location/Asset Handover Process
- Inspection Process

The Workforce

- Service Providers can upload their manpower information from portal
- Workforce classification based on speciality
- Simple and easy Gate pass management
- In House team and site engineers
- Zero mistakes with assignment and tracking
- Escalation process enhancement
- Separate the contractors of HVAC/Generators/FF &FA...etc on the site/building/area level
- SLA Enhancement on each level, Site, building, floor, area, service provider and speciality

The QR cocde

- QR Code Generation For Sites/Building/Floor/Room.
- QR Code For Meetings, Receptionist Can Verify
- QR Code for gate pass verification
- QR Code for workforce/ scan to show all related tasks/other reports
- QR Code for all asset / Scan to create an issue/ Show report
- QR Code for Cheque / Payment collection by suppliers
- QR Code for PCR 14 days verification
- QR Code for vehicles and FSFM assets/laptops

- A standard operating procedure (SOP) is a set of step-by-step instructions compiled by an organization to help the employees execute routine operations. SOPs aim to achieve efficiency, quality output and uniformity of performance while reducing miscommunication and failure to comply with industry regulations.

Non-Conformance

- A Non Conformance is a observation that can be filed by any person in the organization to note non compliance to a specific procedure
- Once Quality Procedures are defined, the goal of a quality focussed organization is to ensure that they hare followed. This ensures consistent quality and parameters as per the customer's expectation. If these procedures are not followed, an observation is recorded via a Non Conformance or called NC in quality systems.
- We can create a Non Conformance by selecting the Quality Procedure against which it was observed, maintain its status and record corrective and preventive actions

Milestones & KPIs

- You can automatically track milestones based on the lifecycle of a document if it undergoes multiple stages.
- Milestones is a great source for reporting and notifying.
- Using Milestones with Dashboards
- Based on energy point rules created, users will automatically get points when they complete activities which are tracked using the Energy Point System.
- Energy Point Rules can be defined to automatically give Energy Points to users who achieve a milestone. This can be used to incentivize action on transactions at various levels.
- Review system can be used to "Appreciate" or "Criticize" someone's work.

The Metabase Integration

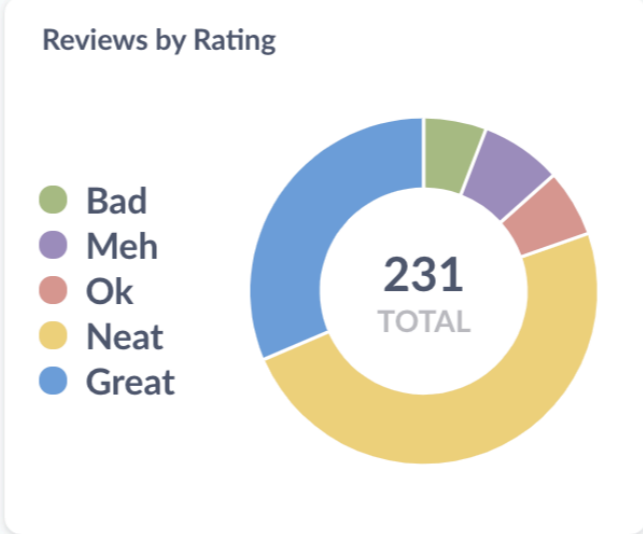

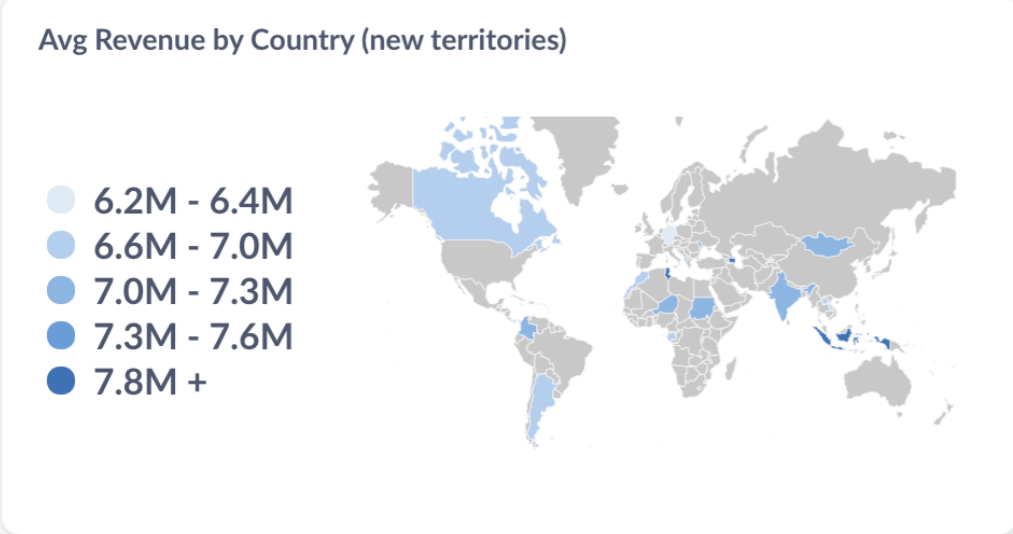

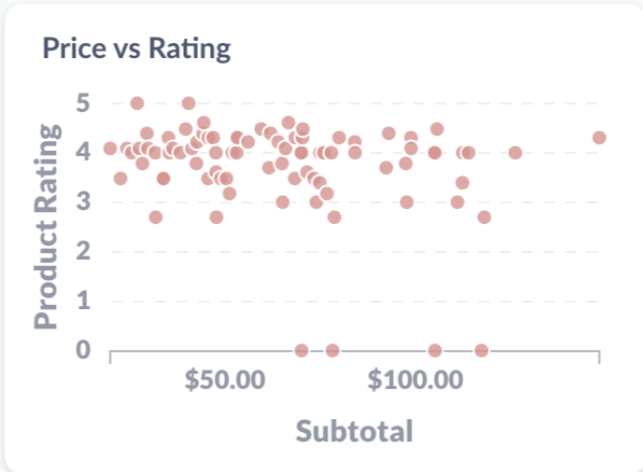

- Set up in five minutes
- Metabase is a simple, useful and easy to use dashboard tools.
- Build handsome, interactive dashboards with filters, auto-refresh, fullscreen, and custom click behavior.
- Create models that clean up, annotate, and/or combine raw tables
- Set up alerts to have Metabase notify you when your data changes.
- Embed charts and dashboards in your app, or even your entire Metabase..
- You can add filters to dashboards and connect them to fields on questions to narrow the results
